Prototyping plan

This tool is used to help you test your service concepts and reduce the risk of pursuing new concepts that may not work by creating experiments. Identify your most concerning assumption about the concept as a starting point and follow the map. Each experiment leads to new insights, decisions and then new assumptions to test. Use one of these for each of your most critical assumptions

| Leap of faith assumption Your biggest assumptions. | | | |
|---|---------------------------|--|---------------------------|
| Tour biggest assumptions. | | | |
| | | | |
| | | | |
| | | | |
| Hypothocic | | | |
| Hypothesis Your secondary assumptions. | | | |
